About your day surgery

The Royal Women’s Hospital

Easy English
**Hard words**

This book has some hard words.

The first time we write a hard word
- the word is in **blue**
- we write what the hard word means.

**You can get help with this book**

You can get someone to help you
- read this book
- know what this book is about
- find more information.
About this book

This book is written by the Royal Women’s Hospital.

This book is about your **day surgery** at the hospital.

Day surgery is when you come to hospital for an operation but do **not** stay overnight.

If you have questions about what will happen in your operation you can

- ask your doctor

  or

  - find information on our website [www.thewomens.org.au](http://www.thewomens.org.au)
When to come to the hospital

Call the Day Surgery Unit to find out what time you need to come to the hospital.

Call them on 8345 3300.

You can call from Monday to Friday between 10.30 am and 12 noon.

You must call them on the work day before your operation.

For example, if your operation is on Monday you will need to call on the Friday before.
The time you must come to the hospital is different from the time of your operation.

We can not tell you the time of your operation.

We can only tell you if the operation is in the morning or the afternoon.

How long will you be in hospital?

You will be in hospital until your doctor says you are well enough to leave.

The time in hospital is different for everyone.
How to get ready for day surgery

There are some things you need to do before you come to the hospital.

If your operation is in the morning you must **not** eat or drink after midnight on the day before the operation.

If your operation is in the afternoon you must **not** eat or drink after 7 am on the day of the operation.

It is OK to drink a small amount of water 2 hours before you come to the hospital.
You must **not** smoke for at least 12 hours before your operation.

Before your operation you must tell your doctor what other medicine you take.

Tell your nurse if you take **aspirin**.

Aspirin is medicine that is used to help fevers and mild pain. For example, muscle aches and headaches.

Aspirin is also used to help stop pain and swelling for people with arthritis.
Important things to remember

Tell us straight away if you get a cough or fever in the week before your operation.

You must tell us if you might be pregnant.

You can call the Elective Surgery Booking Office on 8345 3335.
What to bring to the hospital

There are some things you need to bring with you to the hospital.

You must bring

- your Medicare card

- your Health Care card if you have one

- your private health insurance card if you have one

- any medicine you take now.

  Medicine can also be vitamins and herbal medicine.
You can also bring

- something to read
- comfortable clothes
- glasses if you wear them.

Do not bring

- valuables.  
  For example, jewellery.
- lots of money
- contact lenses
- personal things.
  For example, nail polish or make-up.
What will happen in hospital?

When you get to hospital you will be admitted.

Admitted means the hospital knows you are there and ready.

If you are a private patient you will need to pay when you get to the hospital.

You can pay at the accounts office on the ground floor of the hospital.

When you are ready for the operation you will walk to the operating theatre.
After your operation you will rest on a trolley in the recovery area.

Nurses will look after you in the recovery area.

When you feel well you can

- get dressed

- sit in a comfortable chair

- eat and drink something.
You can bring someone with you to the hospital. For example

- a support person

- a friend

- a family member.

The person you bring with you to the hospital can wait for you in the waiting room or coffee shop.

They can **not** visit you in the recovery area.
When can you go home?

You should make sure someone can take you home from hospital after your operation.

Someone must stay with you at home to help you overnight.

When you are ready someone can get you from the Day Surgery Unit on the 3rd floor of the hospital.

If your doctor says you need medicine you can get it from the hospital pharmacy on the 1st floor of the hospital.

You must pay for the medicine before you leave the hospital.
What happens after you leave?

In the operation you will have had some very strong medicine to put you to sleep.

This medicine can still affect you for a little while after you leave hospital.

For 24 hours after the operation you should **not**

- drive a car
- drink alcohol
- sign legal documents
- make important decisions.
You will get information from the hospital about what to do after your operation.

We will send you more information if you need to come back to hospital to see your doctor.
If you have a problem

If you have a problem or complaint you can contact the hospital.

A complaint is when

● you are not happy

and

● you tell us the reason.

Call the Consumer Liaison office
8345 2290
