

SHARED MATERNITY CARE

AT THE WOMEN'S AT PARKVILLE: DURING COVID-19

What is shared maternity care?

With shared maternity care, the Women's Hospital and your chosen GP (family doctor), obstetrician or community midwife 'share your care' during your pregnancy.

For most of your routine pregnancy appointments you will see or have a telephone/teleconference with your GP/obstetrician/midwife.

You will also have some appointments at the Women's.

Why choose shared care?

Shared care is a popular choice for healthy women with a normal pregnancy. In choosing shared care you:

- » have most of your care close to your home or work
- » build a relationship with your doctor and continue to see them after your baby is born
- » have fewer hospital visits.

Shared care doctors and midwives may charge some out-of-pocket fees. Please discuss this with your shared care doctor/midwife.

The Women's has community clinics in Fawkner, Essendon and Footscray. You can choose to attend hospital appointments at one of these instead of coming to the Hospital.

If you develop problems during your pregnancy and shared care is not suitable, we will change your model of care.

How does shared care work?

Your chosen doctor/midwife must be accredited with the Women's to provide shared care.

If your usual GP is not accredited, the Women's will help you find an accredited community doctor/midwife. For more information visit our website and search for Accreditation and Affiliates List.

If you are healthy with a normal pregnancy, shared care is the likely model of care you will be allocated to.

When you start shared care, the Shared Care Coordinator will mail you by post a folder containing:

- » your pregnancy record
- » the appointment details of your hospital visits
- » a schedule of visits for your pregnancy care
- » forms for your 26-27 weeks diabetes and others tests to be done in the community and your routine 36 week swab test to be done at the Women's

You will need to organise your own shared care doctor/ midwife appointments.

It is important to bring your folder to all your shared care and hospital appointments, including when you come in to have your baby. This is how the doctors and midwives communicate about your care.

Changes in care during COVID-19

To keep you safe at this time:

- Face to face visits with your doctor/midwife have been minimised, with some of these being replaced by telephone/video call
- For face to face visits, it is important to keep these to less than 15 minutes and to only go by yourself
- Practice good hand and personal hygiene and social distancing, including at your pregnancy visits
- Please contact your care provider by phone before your visit if you are unwell or have been in contact with a person who has or may have COVID-19
- There are no childbirth education or hospital tours (please see our website for virtual tours)
