SHARED MATERNITY CARE
AT THE WOMEN’S

What is shared maternity care?

With shared maternity care, the Women’s Hospital and your chosen GP (family doctor), obstetrician or community midwife ‘share your care’ during your pregnancy.

For most of your routine pregnancy appointments you will see or have a telephone/teleconference with your GP/obstetrician/midwife.

You will also have some appointments at the Women’s.

Why choose shared care?

Shared care is a popular choice for healthy women with a normal pregnancy. In choosing shared care you:

» have most of your care close to your home or work
» build a relationship with your doctor and continue to see them after your baby is born
» have fewer hospital visits.

Shared care doctors and midwives may charge some out-of-pocket fees. Please discuss this with your shared care doctor/midwife.

If you develop problems during your pregnancy and shared care is not suitable, we will change your model of care.

Shared care information

When you start shared care, the Shared Care Coordinator will mail you by post a folder containing:

» your pregnancy record
» a maternity wheel that includes your hospital appointment times
» a schedule of visits for your pregnancy care (this form)

You will need to organise your own shared care doctor/midwife appointments.

It is important to collect your visit notes and bring these to all your shared care and hospital appointments, including when you come in to have your baby. This is how the doctors and midwives communicate about your care.

Please use your My Health Record (MHR) and encourage your shared care doctor/midwife to upload visit notes and test results to MHR.

Your hospital appointments and information

On Health Hub you can access the “Pregnancy Education Companion” that tells you about what you can expect in pregnancy, view your hospital notes, results and appointments (excluding ultrasound).

Go to: www.thewomens.org.au/patients-visitors/parkville-health-hub

COVID-19

To keep up with the latest guidance for patients and visitors, see the COVID-19 Information Hub on the Women’s website.

To keep you and others safe:
- Please contact your care provider by phone before your visit if you are unwell or have tested positive for COVID
- Practice good hand and personal hygiene and social distancing, including at your pregnancy visits

Childbirth education and hospital tours

Please see the hospital website for a hospital virtual tour, childbirth education videos or to book online childbirth education classes.
