

Accessing SHRFV eLearn modules

The SHRFV eLearn modules form part of a suite of resources developed to support SHRFV hospitals and health Services to align to the Family Violence Multi-Agency Risk Assessment and Management (MARAM) Framework.

The available SHRFV eLearn modules are:

- *Foundational Practice Family Violence Training Module V3* (updated April 2022)
- *Sensitive Practice Family Violence Training Module V3* (updated April 2022)
- *Antenatal Family Violence Screening and Response Training Module V3* (updated April 2022)
- *SHRFV MARAM Intermediate Training Modules V2* (updated June 2021)

For detailed information about the *SHRFV MARAM Intermediate Training Modules* please refer to the *SHRFV MARAM Intermediate Training Resources Overview* on the SHRFV toolkit website.

Editing and Contextualising Options

The eLearn modules have been developed as a 'general' version with no specific references to procedures or policies used by a particular hospital or health service. This is intended to make the modules as accessible as possible for hospitals and health services who do not have the software to edit and contextualise the modules.

The e-learn modules have been developed utilising the authoring software Articulate 360. The .story source file (editable version) and compressed zip file for each module are available on the SHRFV Toolkit website. In order to upload to the [SHRFV Toolkit website](#) the editable .story source file for each module has been split into two files. Please ensure you download the correct files for your needs.

Hospitals and health services with Articulate software will be able to edit and contextualise the modules using the .story source files.

Content developed in Articulate is also SCORM compliant. SCORM, which stands for Shareable Content Object Reference Model, is a set of technical standards for eLearning software products. SCORM tells programmers how to write their code so that it can “play well” with other eLearning software. It is the de facto industry standard for eLearning. Specifically, SCORM governs how online learning content and Learning Management Systems (LMSs) communicate with each other. If your organisations LMS is SCORM compatible you will be able to upload the zip files onto your organisation’s LMS to allow access for users and track their progress.

Publishing Options for eLearn

Articulate has the capability of publishing in several different ways to increase learner accessibility; how your learners will be able to access it will largely depend on what systems you already have in place at your hospital or health service.

For Hospitals and Health Services with an LMS

If you need to track learners' progress and results

Upload the compressed zip files to your learning management system (LMS). Storyline 360 supports cmi5, Tin Can API (xAPI), SCORM 2004, SCORM 1.2, and AICC LMSs. If you're not sure how to upload courses to your LMS or invite learners, check with your LMS provider for instructions.

If you don't need to track learners' progress or results

If you don't need to track learners' progress or results, then web publishing is a good option. Give the compressed zip files to your server administrator to upload to a web server (this could be your organisation's intranet or another web server your learners can access easily). Finally, give learners the URL to access.

If you don't have access to a web server, here are some free options:

- Amazon S3 offers free hosting with generous usage limits.
- Google Cloud also has a free hosting service.

Access for Hospital and Health Services without an LMS

For hospital and health services without an LMS, both the *Antenatal Family Violence Screening and Response Training Module V3* and the *SHRFV MARAM Intermediate Training Modules V2* eLearn modules are available through the Victorian Government Information Sharing Schemes and MARAM online learning portal, <https://elearn.childlink.com.au/>. This link can be sent to learners. This option will *not* allow you to track your learners' completion/progress like an LMS would.

For further information about the modules email shrfv@thewomens.org.au
